

TECHNICAL DATA SHEET

ND Vegetation Blanket - Sedum

ND Vegetation Blanket - Sedum

The ND Vegetation Blanket - Sedum, which includes a mixture of at least 4 different small and large leafed species of Sedum, has been grown at the Nophadrain Sedum nursery. The blankets are well hardened and have experienced at least one winter period. The blankets can provide at least 85% coverage. Upon request wild flowers and herbs can be included in the ND Vegetation Blankets.

Applications

The ND Vegetation Blanket - Sedum is a component of the Nophadrain Extensive Green Roof System. For the Nophadrain Extensive Green Roof – steep pitched roof, the ND Vegetation Blanket - Sedum Reinforced must be used.

Properties

- Material carrier: coco blanket with plastic carrier
